Professional Summary

B.Tech Computer Science student (2027) specializing in data analytics, with operational analytics experience as a Data Analyst Intern and practical data science training. Proficient in SQL, Python, Excel and Power BI, with a working foundation in statistics, data visualization and business problem-solving.

Technical Skills

Programming & Databases: SQL (CTEs, Window Functions, Joins), Python, SQLite
Data Analytics & Visualization: Excel (Pivot Tables, Power Query, Power Pivot, DAX, Solver), Google Sheets, Power BI (DAX, Power Query), Dashboarding, Cohort & Funnel Analysis, EDA, Data Cleaning
Statistics & Machine Learning: Pandas, NumPy, SciPy, Scikit-learn
Tools & Platforms: Git/GitHub, Jupyter Notebook, Google Colab, Streamlit

Work Experience

Data Analyst Intern – Safe Cargo Jan 2026 – Apr 2026
Transport & Logistics

- Analysed operational and financial data across multiple branches in Excel (Pivot Tables, lookup functions) to track freight margins, profitability and profit sharing.
- Compared profit and margin by client company and route to identify high- and low-performing accounts, supporting pricing decisions.
- Assisted transport bidding and rate contract analysis by evaluating margins on goods movement between locations.
- Tracked profit sharing across branches in Excel, alongside margin by client and route.
- Cleaned, consolidated and reconciled branch-level datasets into structured reports for management review.

Projects

SaaS Unit Economics & Scenario Planning Model | *Excel, Power Query, Power Pivot, DAX, Solver*

- Built an automated Excel model tracking MRR, churn rate and LTV/CAC across customer tiers using Power Query and Power Pivot (DAX).
- Used Power Query for data preparation and a Power Pivot data model with DAX measures for each customer tier.
- Used Solver and 2-way sensitivity tables to simulate cash-runway impact across 5+ churn scenarios, supporting budget allocation decisions.

Titanic Survival Prediction | *Python, Scikit-learn, XGBoost, Power BI*

- Compared Logistic Regression, Decision Tree, Random Forest and XGBoost classifiers (best 88.9% ROC-AUC); built a Power BI view of survival rate by passenger class.
- Performed EDA on passenger data and built an interactive dashboard (HTML/Chart.js) to explore survival patterns.
- Built a Streamlit app for interactive survival prediction using the trained model.

Training & Certifications

Data Science Training – QSpiders Jun 2026 – Sep 2026
Classroom training *Gurugram*

- Covered Python (Pandas, NumPy), SQL, exploratory data analysis, Power BI visualization, statistics, machine learning with model evaluation, and Generative AI fundamentals.
- Capstone: market-entry analysis for a car manufacturer comparing India and Japan sales data, using a classification model to estimate purchase likelihood.
- Justified modeling decisions and interpreted model coefficients to support the business case for India market entry.

Job Simulation: Tata iQ Data Visualisation (Forage) | **Online Courses**: Kaggle Python & Pandas

Education

The Technological Institute of Textiles & Sciences (TITS), Bhiwani 2023 – 2027
B.Tech, Computer Science – Aggregate: 81%

Achievements & Extracurricular Activities

National-level discus throw athlete; competitive Kabaddi player at tournament level.
Tutored and mentored peers and juniors in academic subjects, strengthening communication and explanation skills.
